PROFILE

Final-year Computer Science student who designs and ships complete applications, from backend to production deployment. As co-founder and CTO of a SaaS company, I work daily on third-party API integration, application security and running a product used by real customers.

Looking for: a 16-week software development internship, from 23 February to 12 June 2027 (extendable to August). France or Luxembourg. Internship agreement provided by Université de Lorraine.

EXPERIENCE

Aleth — Co-founder and Chief Technology Officer

Since 2025

B2B SaaS company · Python, FastAPI, PostgreSQL, Next.js

- **Designed and built the entirety** of a platform that maps how AI tools are used across a company. The product is deployed in production and currently running a pilot with its first client.
- **Integrations:** read-only connectors to the Google Workspace Admin and Microsoft Graph APIs, using OAuth 2.0 and tenant admin consent.
- **Development:** analysis and classification engine, PDF report generation, customer portal, Stripe subscription flow and webhook handling.
- **Infrastructure:** deployment and administration of a Linux VPS running nginx, PostgreSQL database, authentication and authorisation management, data isolation between tenants.
- **Security:** application security audit and remediation of the vulnerabilities found, ahead of the first client deployment.

Internship — AI and Full Stack Development

April – June 2026

Palaiseau, France · Python, RAG/CAG, Google Gemini API

- Improved the relevance and accuracy of an AI-powered virtual assistant.
- Implemented retrieval-augmented generation techniques and integrated a large language model through its API.
- Worked in an agile team within a professional development environment.

EDUCATION

BUT in Computer Science (three-year French undergraduate degree, 180 ECTS)

2024 – 2027

IUT de Metz, Université de Lorraine · Application Development track

Advanced development, software quality and testing, software architecture, databases, virtualisation, automation, mathematical modelling.

Elements of AI — Certificate

2025

University of Helsinki · Machine learning, deep learning, neural networks

TOEIC Listening & Reading — 815/990

2025

CEFR level B2

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, Java, PHP, C, SQL, Bash

Frameworks and libraries: React, Next.js, Node.js, FastAPI

Databases: PostgreSQL, MySQL, Supabase

Infrastructure and tools: Linux, Git, nginx, VPS, REST APIs, OAuth 2.0, Stripe, Cisco Packet Tracer

Methods: Agile methods, UML, SOLID principles, design patterns, systems programming (processes, threads, sockets)

ACADEMIC PROJECTS

- **Drone network** — management system for a delivery drone network, built on graph algorithms (TypeScript).
- **Games and AI** — game-playing AI for Nim and tic-tac-toe with an interactive command-line interface (C).
- **Search engine** — custom search engine using natural language processing and a large language model (Python).
- **Parking guidance** — application guiding drivers to the nearest available parking space, with route calculation (React, Mapbox).

LANGUAGES AND OTHER

French: native · English: B2 (TOEIC 815) · German: B1 · Arabic: A2

Interests: Writing (an essay on artificial intelligence) · Drawing and creating a manga · Hiking · Technology watch
